

## Technical Document

**Document No:** 04-01001  
**Document Title:** Determining the Installed OS/400 Release Level  
**Category:** Hints, Tips & FAQ  
**Functional Area:** Operating System  
**OS/400 Release:**

### Document Description:

To display the installed operating system level on your AS/400 or iSeries box, you can use the Display Software Resources (DSPSFWRSC) command. On any command line type the following and then press Enter:

```
DSPSFWRSC
```

When the command completes, you will see a list of all installed parts of the operating system. Press the F11 key to display the appropriate installed release levels.
